

BRAVO

Following on from the groundbreaking APACHE soundset, programmed by my good friend Brian Cowell, the BRAVO soundset aims to expand and reinterpret APACHE. BRAVO features many reprogrammed patches from the original APACHE works files, as well as a number of new, exciting sounds. To make it easier to differentiate the sounds, all APACHE derived sounds start with "B:" to denote BRAVO.

The BRAVO package contains a 50 sound expansion pack for existing APACHE owners, featuring sound effects, pads, leads, basses and a number of experimental electronic sounds. BRAVO is a free upgrade for all APACHE owners that purchase the soundset before 31st December 2009.

Support for the BRAVO sound set is kindly provided by CUNKA at the MASTERING VAST forums.
